COMPANY

With its 125 years of existence, Buracco is an expert in his sector, from standard to specific products. Buracco provides dedicated monitoring solutions, through an involved commercial team and a specialized technical service.

- Located in Burgundy, France over 15 000 m²
- Cryogenic Test Benches
- High Pressure Test Bunker Water & Gas
- Production Unit of 3 500 m²
- CNC Machining Centers
- Low Pressure Test Bench

Quality & Satisfaction:

Control processes are established under the ISO 9001 quality insurance and certify our design, production, assembly and test processes.

Monitoring & Reliability:

Our Technical Support provides contracts of commissioning, maintenance, compliance and periodic inspections of our products, to ensure the best reliability of our valves.

Ethics:

Buracco strives to keep the **Made in France** . In addition the company is ethically committed to achieve excellence in design, customer service, quality and safety. We set up a continuous training policy of our staff, in order to provide to our customer the best relationship and to assure professional fulfillment for our employees.

MONITORING SOLUTION

Produced according to European and International standards, Buracco offers high performance valves and a technical service which enables an efficient project management. A suitable organization allows us to ensure effective monitoring on stock equipment and specifically executed equipment, to meet all the needs of our customers.

Designer and manufacturer, Buracco has the knowledge and tools required for its development:

- Engineering studies, technical files, research and development.
- Active member of the standardization committee AFNOR (Association Française de Normalisation) and the European and International technical committees.
- Integrated design and development of our valves, according to high technical level.
- Compliance with regulations and international standards ensured by a high degree of quality management.
- Customer satisfaction is the focus of our collective commitment.

Technical Assistance

Specialized technical unit offering assistance benefits to commissioning and maintenance contracts to ensure high quality servicing.

Customized Offer

Business team listening to the customer, analysing and responding to user's technical specifications.

Logistics & Delivery

With our SEI packaging partner and forwarders, we ensure fast and secure deliveries.

Research & Development

Research and Development unit breaking new grounds and adapting our solution to customers needs.

Quality & Compliance

We guarantee the quality of our products by an ISO 9001 management system and compliance inspections achieved by accredited organisations.

Production & Control Management

Continuous monitoring ensuring the integrity of each product at every stage of manufacturing.

GOALS

- **Customer Satisfaction**

Combining expertise, listening and professionalism, our teams offer the best solutions for our customers needs. We implement evolutions and follow them through continuous action plans.

- **Forecast**

Based on strong feedback our teams analyse each information to improve the quality and reliability of our products.

- **Optimize the Quality**

Investments in high-performance industrial tools, in-house training and internal audits are the keys to our improvements (efficiency, quality & safety).

- **Supplier Partnership**

We attach great importance to the relationship with our suppliers. We set up surveillance audits and work to deepen common improvement areas and strong partnership.

TRUSTED & CERTIFIED

Our products are certified by major European and International standards:

- **ISO 9001 version 2008 – PED 97/23/CE – ATEX 94/9/CE**
- **FIRESAFE ISO 10497**
- **CERTIGAZ – SGVW – APSAD – (...)**
- **BV MARINE DIVISION – RUSSIAN CERTIFICATES – (...)**

Our 125 years experience and expertise recognized by the major actors in HVAC, cryogenic, oil & gas, chemical/petrochemical and energy production plant, make Buracco a key player on the market.

MARKETS

Oil & Gas

We ensure the reliability and safety of your facilities, from exploration to distribution, through the refining, transportation and storage. Firesafety, integrated security systems, we provide the solution for your application.

Industrial Process

Our presence on the automotive, paper, water treatment, desalination and steel industries, allows us to adapt the products to the needs of our customers.

Chemistry / Petro-chemistry

Distribution, transport and storage, our solutions enhance reliability and secure your installations. We are listening to our customers needs, and through our fire safety or failsafe systems, we provide solutions to your applications.

Power Generation

Thermal, hydraulic and nuclear power plants, our products meet the specific operating and safety requirements. Our range of quality and high-pressure valves will meet all your needs.

Cryogenic

We develop and industrialize cryogenic sectioning devices meeting applications of the liquefied gas industry, but also in chemistry industry.

HVAC

Air processing, Heating, Ventilation, Air conditioning, Fire protection, Gas, etc.

Manual or motorized control, rubber or metal seat, taking into account your requirement and the economic factor, we offer you the most suitable solution.
